

Freelance Translator (f/m/d) English - Turkish

Your task profile

- You support us in translating our software from English into Turkish.
- As a freelance translator you are looking for a long-term cooperation.
- You translate different translation bundles (Passolo) within our 3-week software release cycles.
- You will independently maintain the terminology for your projects.
- Workload per month: about 800-1500 words; delivery times: 1-7 workdays.

Your Skills

- You have a degree in translation and/or proven years of experience in translating.
- You are proficient both in English and Turkish.
- You have already worked with translation tools and understand the basic concepts.
- You are interested in software systems and you can handle flexible deadlines.

Your benefits

- Support by contact persons in the localization department.
- Available translator platform that you can access at any time without administrative effort.
- Flexible and independent working times within the agreed delivery periods.

As a leading provider of CRM & xRM software and product configurator software, we design innovative solutions for the future with Customer Centricity. Well-known customers, a wide range of industry solutions and a high investment in the potential development of our co-creators are what distinguish us. This is reflected in a high level of satisfaction.
